

PROFESSIONAL LOGO DESIGN

Build a brand customers *recognize*, trust, and remember.

Custom, human-designed logos built around your business — delivered in 11 file formats, fully owned by you, ready for every application from your website to your vehicle wrap.

WHY A PROFESSIONAL LOGO MATTERS

7 SEC

To form a first impression.

75 %

Identify a logo as the #1 brand symbol.

80 %

Recognition lift from a strong logo.

FOUR REASONS TO INVEST

**Credibility**

Look established the moment a customer sees you.

**Recognition**

Stand out from competitors and stay memorable.

**Versatility**

11 formats — ready for web, print, signage, social.

**Ownership**

You own your logo outright. Trademark it.

HOW IT WORKS

From brief to final files in two to three weeks.

A dedicated coordinator manages every step. No template farms. No designer roulette.
Just a clear, three-stage process built for small businesses.

01 – Day 1-2

Creative brief

A dedicated Logo Design Coordinator contacts the customer within two business days to capture the creative brief — business goals, style preferences, colors, and reference logos.

02 – Day 3-10

Custom concepts

In-house designers deliver up to ten original concepts in three to five business days. Up to three rounds of revisions are included to get the final design exactly right.

03 – Day 11-14

Final delivery

Final files arrive within three business days of concept approval — 11 formats (AI, EPS, PDF, JPG, PNG, GIF, ICO), full rights transferred, ready for any application.

PLANS

Three tiers for every budget.

All plans include the Logo Design Coordinator, three rounds of revisions, the 11-format file package, and full ownership of the design.

SALES PLAYBOOK

How to sell Professional Logo Design.

Rep-facing reference. Ideal customer profile, discovery questions, objection handling — all on one page.

IDEAL CUSTOMER PROFILE

- 01
- New SMBs establishing a brand for the first time
- 02
- Established businesses with logos older than 7–10 years
- 03
- Trust-heavy verticals: contractors, plumbers, restaurants, legal, healthcare
- 04
- Ecommerce SMBs needing a logo for packaging, print, and digital
- 05
- Any SMB using a free logo tool (they don't own their design)

DISCOVERY QUESTIONS

- Q. 01
- Walk me through how customers first discover your business.
- Q. 02
- When did you last update your logo? Average rebrand: 7–10 years.
- Q. 03
- Does your logo match your signage, cards, and social presence?
- Q. 04
- What do you want customers to feel when they see your brand?
- Q. 05
- Ever had a customer confuse you with a competitor?
- Q. 06
- Any print plans coming up — vehicle wraps, uniforms, packaging?
- Q. 07
- If starting fresh, would you want a trademark-able logo you fully own?

OBJECTION HANDLING

- “It's too expensive.”
- Plans start at entry-level pricing. Logos last 7–10 years — pennies a day for your strongest brand asset.
- “My customers already know me.”
- They do — new ones don't. 75% of consumers identify brands by their logo. Referrals need something visual.
- “I can make one for free.”
- Free tools often don't transfer full rights, so you can't trademark — and a similar business could end up with the same design.
- “I already have a logo.”
- How old is it? 7–10 year lifespan. The coordinator can recommend refresh vs. redesign.

- “A family member can do it.”
- Design experience? Full rights? Vector formats for signage? Most favors miss these.

COMPETITIVE SNAPSHOT

- “vs. Free tools”
- Human-designed, full rights, 11 formats.
- “vs. Freelancers”
- Dedicated coordinator, 75K+ logos delivered in-house.
- “vs. AI logos”
- Human logos are more differentiated and easier to trademark.
