

Stand Out In A Crowded eCommerce World

Running a small business can be a daunting task. Not only do they have to worry about creating a quality product or service, but they also have to find a way to attract customers and stand out from the competition.

In this article, we've included best practices to help businesses drive more eCommerce success.

Not an expert on eCommerce? No worries. We are including a [video](#) introducing the world of eCommerce. This [video](#) provides an overview of eCommerce, the latest trends and more.

1. Build a strong brand

A strong brand is much more than just a logo or design – it encompasses the values and personality of your business. Define your purpose, and make sure it is consistently reflected in everything you do.

In a recent [Forbes](#) article, Barry McCarthy, President & CEO of Deluxe, speaks about the importance of communicating a company's purpose and values as a way to set it apart. With purpose deeply intertwined in operations, consumers are drawn to the company for their products and services in addition to its impact on their core principle.

2. Prioritize exceptional customer experience

With so many options available to customers, creating a seamless experience for customers across all channels, including in-store, online, and through social media will help businesses stand out from the competition. Customers come back when they feel supported in every stage of purchase.

To increase loyalty and make it hard for customers to leave, businesses can improve the buying experience with convenient options such as fast and free shipping, clear return policies and fast online support service. What's more, they can enable automatic reorders for subscription-based products. Subscriptions not only help customers regularly get what they want with just one click but also generate recurring revenue for merchants.

3. Encourage process change to improve efficiency

By streamlining processes and eliminating unnecessary steps, small businesses can increase productivity and focus on higher-value tasks. Think about how much time small businesses could save if manual processes and repetitive tasks were cleared out from their schedule. The good news is that it's possible through our eCommerce platform! Small Businesses can connect their store to powerful tools like Zapier or Shippo to automate many workflows in their operations, including sales, marketing, inventory and shipping. Automated emails can also be enabled right from their online store control panel.

By implementing process changes, we can help small businesses can improve productivity, reduce costs, and better meet the needs of their customers.

Building a strong brand and creating a seamless omnichannel experience can be a challenging proposition. However, these strategies can help you stand out in a crowded market and achieve long-term success.
