COVER

AGENDA

What we'll cover.

Twenty-five minutes, five sections. Most of the value lives in section five.

01	Why logos matter now	The 2025 data on first impressions and brand trust.
02	The product	What it is, who it's for, and what's included.
03	The creative process	From brief to final files in 2–3 weeks.
04	Plans	Three tiers for every budget.
05	Discovery, objections, next steps	How to run a winning sales call.

WHY LOGOS MATTER

7 SECONDS

The time consumers take to form a first impression of a business.

A professional logo is the strongest visual signal that shapes that impression — and the brain decides whether to trust a business in that window.

RECOGNITION LIFT

80% Brand recognition lift from a well-designed logo.

TRUST BOOST

40% Trust boost prospects feel after seeing a polished logo.

IMPRESSION WEIGHT

90% Share of first-impression weight driven by logo color alone.

WHAT'S AT STAKE

The cost of a weak or missing logo.

COST 01

Lost credibility

A logo makes a business look established. Without one, prospects default to whichever competitor looks more professional.

COST 02

Missed differentiation

Logos are how customers tell one business from another. A generic or absent mark means customers can't find you.

COST 03

Lower memorability

75% of consumers say a logo is the most recognizable brand symbol. No logo means no place in the customer's memory.

COST 04

Lost revenue

81% need to trust before buying. 87% will pay more for brands they trust. A weak logo leaves money on the table.

What makes it different.

Four product fundamentals that separate Professional Logo Design from free tools, freelancers, and AI generators.

05 / 13

01 - Human designers

People, not prompts.

Ten-plus years of experience and 75,000+ logos delivered. By 2025, 20% of all logos are AI-generated — which makes human-designed marks more differentiated, not less.

02 - Full ownership

The customer owns the mark outright.

Trademark-able. Royalty-free. A formal rights-transfer letter is included with every project. Free logo tools rarely transfer full rights.

03 - 11 file formats

Ready for every application.

AI, EPS, PDF, JPG, PNG, GIF, and ICO — six color versions and five black-and-white. Web, print, merchandise, social, signage.

04 - Fast turnaround

Initial concepts in three to five business days.

Full projects typically complete in two to three weeks end-to-end. No six-month agency engagements.

A few of the brands we've built.

LOGOS DELIVERED

75K+

VERTICALS

20+

THE CREATIVE PROCESS

From brief to final files.

END-TO-END TIMELINE

2 – 3 weeks

01 – Day 0

Purchase & welcome

Customer purchases a plan and receives a welcome email confirming the order.

02 – ≤ 2 days

Coordinator outreach

A dedicated Logo Design Coordinator collects the creative brief — goals, style, colors, references.

03 – 3-5 days

Initial concepts

In-house designers deliver up to ten custom concepts based on the brief.

04 – 3 days each

Revisions

Up to three rounds of revisions. Each round returns within three business days.

05 – ≤ 3 days

Final files

Eleven file formats delivered. Full rights transferred. Rights-transfer letter included.

PROMISE

A single point of contact, end-to-end. No template farms. No designer roulette.

PLANS

Three tiers for every budget.

All plans include the Logo Design Coordinator, three rounds of revisions, the 11-format file package, and full ownership of the final design.

DISCOVERY

Questions to ask on the call.

Seven questions, in order. The first opens every conversation. The last closes most of them.

-
- Q.01 Walk me through how customers find out about your business today – where do they see you first?
-
- Q.02 When did you last update your logo? Most businesses rebrand every seven to ten years.
-
- Q.03 Would your logo match your storefront, business cards, and social media today – or are they out of sync?
-
- Q.04 What's the one thing a customer should feel when they see your brand for the first time?
-
- Q.05 Have you ever had a customer confuse your business with a competitor?
-
- Q.06 Any print plans coming up – vehicle wraps, uniforms, packaging, banners?
-
- Q.07 If you were starting fresh, would you want a logo you fully own and can trademark?
-

OBJECTION HANDLING

The top five concerns — and how to answer them.

"It's too expensive."

Plans start at entry-level pricing. A logo lasts seven to ten years — that works out to pennies a day for your strongest brand asset. 87% of consumers pay more for brands they trust, so the logo often pays for itself in improved conversion.

"My customers already know me."

Existing customers do — new ones don't. 75% of consumers identify a brand by its logo, and without a professional mark, referrals struggle to remember you. New prospects choose whichever competitor looks more established.

"I can make one myself for free."

Free tools usually don't transfer full rights, which means you can't trademark and a similar business could end up with the same logo. You also get only a handful of formats. Our service includes full ownership, 11 formats, and a human designer.

"I already have a logo."

How old is it? The average logo lifespan is about ten years. Businesses that refresh on that cycle consistently report stronger recognition. The coordinator can review whether a refresh or a full redesign is the better fit.

"A family member can design it for me."

A few questions to consider: do they have design experience? Will you receive a rights-transfer letter so you can trademark it? Will they deliver vector formats that scale to signage and vehicle wraps? Most favors miss these.

COMPETITIVE POSITIONING

Why we win.

Four categories. One sentence each. Use the matching row when a prospect names a specific competitor.

HEADLINE

Originality, ownership, formats, and a real human coordinator.

VS.
Free logo makers
CANVA · LOOKA · WIX

Human-designed originality, full rights transfer, 11 file formats. Free tools typically offer limited originality, partial rights, and fewer formats.

VS.
Marketplaces
FIVERR · 99DESIGNS

A dedicated coordinator and an in-house team that's delivered 75,000+ logos — not a stranger juggling thirty concurrent projects. Predictable turnaround.

VS.
Local agencies
BOUTIQUE STUDIOS

Comparable quality at a fraction of the cost, with a defined scope and timeline. No surprise invoices, no scope creep, no six-month engagements.

VS.
AI generators
MIDJOURNEY · TEMPLATE TOOLS

20% of 2025 logos are AI-generated, which means they increasingly look alike. Human-designed marks remain more differentiated — and more defensible as trademarks.

FAQS

The questions customers ask most.

How many revisions are included?

Up to three rounds in every plan. Additional revisions are available for an extra fee.

What file formats do I receive?

Eleven formats — AI, EPS, PDF, JPG, PNG, GIF, and ICO. Six color, five black-and-white.

Can I trademark it?

Yes. Full ownership means you can register the logo as a trademark in your jurisdiction.

How long does it take?

Concepts arrive in three to five business days. Full projects typically complete in two to three weeks.

Who owns the finished logo?

You do. Full rights transfer on approval, including a rights-transfer letter.

What if none of the concepts work?

Three rounds of revisions let us adjust direction. The coordinator can re-brief designers if needed.
